Javier Ortiz Borrego

Senior Software Engineering Manager · Data & AI engineering leadership

Málaga, Spain | javier_ortiz_borrego@hotmail.com | linkedin.com/in/javier-ortiz-borrego-5a994329

PROFILE

Engineering manager with 26 years in software and data engineering, specialising in data integration and enterprise data flow. At JLL Technologies I led a multi-product team across three concurrent product lines, owning delivery from roadmap and stakeholder alignment to quality assurance and release. I apply AI-augmented engineering in my daily work (Claude Code, Claude Agent SDK, agentic workflows) to speed up teams and automate repetitive tasks. Open to new challenges wherever my experience in engineering, data and AI can add value.

CORE COMPETENCIES

- **Leading product-centric teams:** multi-product delivery, people management, mentoring, change and conflict management, Agile and Scrum.
- **Data engineering and integration:** Azure Data Factory, Azure Functions, Azure SQL, Data Lake, Service Bus, Logic Apps, Databricks, PostgreSQL; data mappings and API specifications.
- **AI and agentic engineering:** Claude Code, Claude Agent SDK, Model Context Protocol, agentic workflows.
- **Engineering practices and quality:** release management (change control, peer review), technical debt management, QA, alignment with architecture and security standards (Wiz, Snyk), observability with Datadog.
- **Stack and tooling:** Python, Node.js, TypeScript, React, Git, Azure DevOps, JIRA.

PROFESSIONAL EXPERIENCE

JLL Technologies · Málaga

Senior Software Engineering Manager | Jan 2023 – Aug 2026

- Lead a multi-product engineering team across three concurrent product lines, owning the full delivery cycle: team coordination, stakeholder communication, quality assurance and final decision-making.
- Drive delivery on Node.js, TypeScript, React, Azure, Databricks, Azure Functions and PostgreSQL, with observability in Datadog and security hardened through Wiz and Snyk.
- Bring AI into the development lifecycle: Claude Code, Claude AI and agentic workflows to accelerate team output and automate repetitive work.
- Define processes that stick and resolve issues before they escalate, keeping delivery consistent under complexity.

Product Engineering Manager | Jan 2022 – Jan 2023

- Owned team management, delivery, quality and scaling of products; built and mentored the engineering team and removed impediments.
- Managed roadmap and priorities, release management (change control, peer review) and technical debt.
- Gave technical direction on system and application design, aligned with global architecture patterns and security standards in partnership with Solutions Architecture.
- Led spikes and proofs of concept, and handled support and escalations across data integrations.

Ciklum · Málaga

Project Development Manager | Apr 2021 – Jan 2022

- Managed team, delivery, quality and scale of products, with the same roadmap, release and technical-debt responsibilities, plus mentoring and technical direction.
- Partnered with Solutions Architecture on system and application design; led spikes and POCs and owned support and escalations.

Enterprise Data Architect | May 2020 – Apr 2021

- Owned data layers, integrations and data flows across the enterprise environment.
- Worked across Azure SQL, Azure Tables, Azure Data Lake, Azure Storage, Azure Data Factory, Azure Functions, Service Bus and Logic Apps.
- Built solutions in Node.js and U-SQL, defining data mappings and API specifications.

Senior Developer | Aug 2017 – May 2020

- Developed on Azure with Azure DevOps, Azure Data Factory and Azure SQL Database, in an Agile environment.
- Built a conversational chatbot on Azure Cognitive Services and LUIS.AI.
- Worked with MongoDB, Node.js, PowerShell, Microsoft SQL Server and Team Foundation Server.

EARLIER EXPERIENCE

- **Accenture** – Software Engineering Senior Analyst, Jun 2011 – Aug 2017: team lead across functional design, technical design and development; supply chain solutions on JDA; PL/SQL, ETL processes and Oracle E-Business Suite R12.
- **Zoconet S.L** – Analyst, Jun 2007 – Jan 2011: led technical design for e-commerce client projects across the full lifecycle (Adobe ColdFusion, JavaScript, SQL Server).
- **Novasoft** – Analyst, Sep 2004 – Dec 2007: technical, functional and conceptual design on Oracle Forms and Reports; contributed to project planning and recruiting.
- **Accenture** – Software Engineering Analyst, Jun 2000 – Sep 2004: Oracle E-Business Suite 11i and Oracle Business Intelligence; PL/SQL, technical and functional design, quality assurance.
